

Dualsystems Biotech AG is a service provider specialized in protein-protein interaction discovery and mass spectrometry with worldwide customers from Big Pharma, Biotech Industry and Universities. With our conceptually new LRC-TriCEPS approach we can identify targets of peptides, proteins and viruses on living cells (primary cells and cell lines).

Now, we are looking for a

Scientist (70%-100%)

Your responsibilities include

- Perform customer projects and internal method development projects in the wet lab for LRC-TriCEPS
- Perform LC-MS/MS data evaluation and report writing
- Cell culture
- Flow cytometry
- Sample preparation for LC-MS/MS
- Develop with the team the expansion of the current services

We are looking for a highly motivated, customer oriented individual with know-how in cell culture, flow cytometry, and proteomics. You enjoy to work closely with our team to improve our services, methods, processes and in-house development projects. You are capable of managing projects on your own or in collaboration with others. Language English / German.
